Introduction:

One of the finest blessings and graces Allah bestowed upon His servants is that He provided them with the bounties of earth and permitted them to eat and benefit from it. He forbad them of the bad and whatever that may cause them harm. Allah has made these items clear and distinct in order for them to evade. Allah Almighty says: I and make lawful to them the good things of life and forbid them the bad things (Al-Paraf 157).

It is without doubt that Tasty food has a material and spiritual impact on mankind, their health, and strength, development of their hearts and acceptance of their religion. From the other side, non-Tasty food has a harmful effect. Abu Hurara narrated: The Messenger of Allah, peace be upon him, said, O people, verily, Allah is pure and He accepts only what is pure (Tasty). Verily, Allah has commanded the believers with that which He commanded His Messengers. He said: O Messengers, eat from good things and work righteousness, for indeed I know of what you do (Al-Muhmmad:51). And He said: O you who believe, eat from good things with which We have provided you (Al-Baqarah:72). Then He mentioned the case of a man who, having traveled very far, became disheveled and dusty and he raises his hands to the sky, saying, O Lord! O Lord! While his food is unlawful, his drink is unlawful, his clothing is unlawful, and he is nauseous with the unlawful, so how can he be answered?, reported by Imam Muslim.

Having established that, Muslims pursue whether the food they eat or the things they use are Halal or not is a religious duty confirmed positively ordained by Sharia teachings.

With the passing of time, besides the progress of industrial development, humanly material ambitions and desires to make quick profits, the products and services from the Halal industry become a serious concern to many Muslims worldwide. The Islamic number of consumable products that failed to comply with the Sharia requirements and regulations for production of Halal food, medicine or cosmetic products has contributed to this concern dramatically.

As such, there has been a pressing and urgent need to develop the Halal product manufacturing tools, to develop its services, and above all, to establish a supervisory authority which controls such products in accordance with certain regulations and standards. This would assure the Halal and safety status of manufacturing and production outputs from the primary sources to the consumer are met, and that no Halal product can be certified until it is approved by the competent international...
Objectives:

1. To develop and establish a human and technical resource to examine the current status of the Halal industry.
2. To assess the correct accreditation practices of Halal certificates.
3. To set a future concept for Halal model that suits Islamic countries.
4. To increase awareness and necessary training to the Halal products and services.
5. To promote the Halal lifestyle and its benefits.
الاليوم الأول
الاثني عشر من يناير 1434 هـ الموافق 22 يناير 2013

18:05 - 18:25
قاعة التقرير الكبير
